1. AIMS AND OBJECTIVES

This policy outlines West Leigh Junior School's approach to allergy management, including how the whole-school community works to reduce the risk of an allergic reaction happening and the procedures in place to respond if one does occur. It also sets out how we support our pupils with allergies to ensure their wellbeing and inclusion, as well as demonstrating our commitment to being an allergy aware school.

This policy applies to all staff, pupils, parents and visitors to the school and should be read alongside these other policies:

- Supporting Pupils with Medical Conditions in School
- Safeguarding
- First Aid

It should also be read alongside the statutory document: [Allergy safety in schools statutory guidance](#).

2. WHAT IS AN ALLERGY?

Allergy occurs when a person reacts to a substance that is usually considered harmless. It is an immune response and instead of ignoring the substance, the body produces histamine which triggers an allergic reaction.

Whilst most allergic reactions are mild, causing minor symptoms, some can be very serious and cause anaphylaxis, which is a life-threatening medical emergency.

People can be allergic to anything, but serious allergic reactions are most commonly caused by food, insect venom (such as a wasp or bee sting), latex and medication.

3. DEFINITIONS

ANAPHYLAXIS: Anaphylaxis is a severe allergic reaction that can be life-threatening and must be treated as a medical emergency.

ALLERGEN: A normally harmless substance that, for some, triggers an allergic reaction. You can be allergic to anything. The most common allergens are food, medication, animal dander (skin cells shed by animals with fur or feathers) and pollen. Latex and wasp and bee stings are less common allergens.

Most severe allergic reactions to food are caused by just 9 foods. These are eggs, milk, peanuts, tree nuts (which includes nuts such as hazelnut, cashew nut, pistachio, almond, walnut, pecan, Brazil nut, macadamia etc), sesame, fish, shellfish, soya and wheat.

There are 14 allergens required by UK law to be highlighted on pre-packed food. These allergens are celery, cereals containing gluten, crustaceans, egg, fish, lupin, milk, molluscs, mustard, peanuts, tree nuts, soya, sulphites (or sulphur dioxide), and sesame.

ADRENALINE AUTO-INJECTOR: Single-use device which carries a pre-measured dose of adrenaline. Adrenaline auto-injectors are used to treat anaphylaxis by injecting adrenaline directly into the upper, outer thigh muscle. Adrenaline auto-injectors are commonly referred to as AAI's, adrenaline pens or by the brand name EpiPen. There are two brands licensed for use in the UK: EpiPen and Jext Pen. For the purposes of this Policy we will refer to them as Adrenaline Pens.

ALLERGY ACTION PLAN: This is a document filled out by a healthcare professional, detailing a person's allergy and their treatment plan

DESIGNATED ALLERGY LEAD: The member of staff responsible for overseeing allergy management across the school and acting as the main point of contact for pupils, parents and staff.

NEFFY: Neffy (official name in the UK is EURNeffy) is a nasal spray which delivers adrenaline. It is a needle-free alternative to an adrenaline auto-injector approved. [Neffy was approved for use in the UK in 2025 and distribution is expected from late September. There is a factsheet attached to this Policy for reference.]

INDIVIDUAL HEALTHCARE PLAN: A detailed document outlining an individual pupil's medical conditions, history, treatment, risks and action plan. This document should be created by schools in collaboration with parents/carers and, where appropriate, pupils. All pupils with an allergy should have an Individual Healthcare Plan and it should be read in conjunction with their Allergy Action Plan.

RISK ASSESSMENT: A detailed document outlining an activity, the risks it poses and any actions taken to mitigate those risks. Allergy should be included on all risk assessments for events on and off the school site.

SPARE ADRENALINE PENS: Schools are able to purchase spare adrenaline pens. These should be held as a back-up, in case pupils' prescribed adrenaline pens are not available. They can also be used to treat a person who experiences anaphylaxis but has not been prescribed their own adrenaline.

4. ROLES AND RESPONSIBILITIES

West Leigh Junior School takes a whole-school approach to allergy management.

4.1 Designated Allergy Lead

The Designated Allergy Lead is the Vice Principal. They report to the Principal. They are responsible for:

- ensuring the safety, inclusion and wellbeing of pupils and staff with an allergy;
- taking decisions on allergy management across the school;
- championing and practising allergy awareness across the school;
- being the overarching point of contact for staff, pupils and parents with concerns or questions about allergy management;
- ensuring allergy information is recorded, up-to-date and communicated to all staff;
- making sure all staff are appropriately trained, have good allergy awareness and realise their role in allergy management (including what activities need an allergy risk assessment);
- ensuring staff, pupils and parents have a good awareness of the school's Allergy and Anaphylaxis Policy, and other related procedures;
- reviewing the school's stock of spare adrenaline pens (check the school has an appropriate number for the setting, that they hold the correct dose, that spare adrenaline pens are stored appropriately) and ensuring staff know where they are;
- keeping a record of any allergic reactions or near-misses, reporting these to the appropriate authority (e.g. under RIDDOR) where necessary and ensuring the circumstances are investigated and learnings shared;

- providing on-site adrenaline pen training for staff and pupils and refresher training as required e.g. before school trips;
- regularly reviewing and updating the Allergy and Anaphylaxis Policy; and
- ensuring there is an anaphylaxis drill once a year.

At regular intervals the Designated Allergy Lead will check procedures and report to the SLT.

4.2 Pupil and Parent Support Worker

Our Pupil and Parent Support Worker is responsible for:

- collecting and coordinating the paperwork (including Allergy Action Plans and Individual Healthcare Plans) and information from families (this is likely to involve liaising with the admissions team for new joiners);
- supporting the Designated Allergy Lead with disseminating this information to all school staff, including the catering team, occasional staff and those running clubs;
- ensuring the information from families is up-to-date, and reviewed annually (at a minimum);
- coordinating medication with families and ensuring medication is in date;
- keeping an adrenaline pen register to include adrenaline pens prescribed to pupils and the school's stock of spare adrenaline pens, including brand, dose and expiry date. The location of spare adrenaline pens should also be documented;
- regularly checking spare adrenaline pens are where they should be, and that they are in date;
- coordinate with the School Nursing Team where necessary;
- replacing the spare adrenaline pens when necessary.

4.3 Admissions Team

The admissions team is likely to be the first to learn of a pupil or visitor's allergy. They should work with the Designated Allergy Lead and Pupil Parent Support Worker to ensure that:

- there is a clear method to capture allergy information or special dietary information at the earliest opportunity;
- there is a clear structure in place to communicate this information to the relevant parties (i.e. school nursing team, catering team);
- parents and applicants are informed of catering arrangements during admission events; and
- plans are made for emergency medication if the child is to be left without parental supervision.

4.4 All staff

All school staff, including teaching staff, support staff, occasional staff (for example sports coaches, music teachers and those running breakfast and afterschool clubs are responsible for:

- championing and practising allergy awareness across the school;
- reading, understanding and putting into practice the Allergy and Anaphylaxis Policy and related procedures, and asking for support if needed;

- being aware of pupils (and staff, when necessary) with allergies and what they are allergic to;
- considering the risk to pupils with allergies posed by any activities and assessing whether the use of any allergen in activity is necessary and/or appropriate;
- ensuring pupils always have access to their medication or carrying it on their behalf;
- being able to recognise and respond to an allergic reaction, including anaphylaxis, after appropriate training;
- taking part in training and anaphylaxis drills as required (at least once a year). Whilst it is the school's responsibility to ensure staff have received annual training, if the member of staff is aware they have not received any allergy training in the last 12 months they should alert a manager;
- considering the safety, inclusion and wellbeing of pupils with allergies at all times;
- preventing and responding to allergy-related bullying, in line with the school's anti-bullying policy;
- Forwarding any communication or information that comes directly to them from parents regarding allergens to the Designated Allergy Lead; and
- ensuring that pupils have their medication and their Allergy Action Plan or Individual Health Care Plan with them when leaving school site, for a match or trip.

4.5 All parents

All parents and carers (whether their child has an allergy or not) are responsible for:

- being aware of and understanding the school's Allergy and Anaphylaxis Policy and considering the safety and wellbeing of pupils with allergies;
- providing the school (via the office team) with information about their child's medical needs, including dietary requirements and allergies, history of their allergy, any previous allergic reactions or anaphylaxis. They should also inform the school of any related conditions, for example asthma, hay fever, rhinitis or eczema;
- considering and adhering to any food restrictions or guidance the school has in place when providing food, for example in packed lunches, as snacks or for fundraising events;
- refraining from telling the school their child has an allergy or intolerance if this is a preference or dietary choice; and
- encouraging their child to be allergy aware.

4.6 Parents of children with allergies

In addition to point 4.5, the parents and carers of children with allergies should:

- work with the allergy nurse or other medical practitioner and obtain an individual health care plan and provide a copy to the school as soon as possible after an allergy has been identified;
- if applicable, provide the school or their child with two labelled adrenaline pens and any other medication, for example antihistamine (with a dispenser, ie. spoon or syringe), inhalers or creams;
- ensure medication is in-date and replaced at the appropriate time;

- ensure their child has access to their allergy medication, including two adrenaline pens if prescribed, on the journey to and from school;
- update school with any changes to their child's condition and ensure the relevant paperwork is updated too;
- provide the school with an up-to-date photograph of their child and sign the associated permission for it to be shared appropriately as part of their allergy management; and
- support their child to understand their allergy diagnosis and to advocate for themselves and to take reasonable steps to reduce the risk of an allergic reaction occurring e.g. not eating the food to which they are allergic.

4.7 All pupils

All pupils at the school should:

- be allergy aware;
- understand the risks allergens might pose to their peers and respect measures to support them;
- learn how they can support their peers and be alert to allergy-related bullying;
- older pupils will learn how to recognise an allergic reaction and support their peers and staff in case of an emergency; and
- understand why snacks brought in from home are limited and must be nut free.

All of the above will be explained to pupils in an age and capability appropriate way.

4.8 Pupils with allergies

In addition to point 4.7, pupils with allergies are responsible for:

- knowing what their allergies are and how to mitigate personal risk (depending on age and capability);
- avoiding their allergen as best as they can;
- understanding the importance of following the school specific processes of lunch and snack services and how that mitigates risk;
- understanding that they should notify a member of staff if they are not feeling well, or suspect they might be having an allergic reaction;
- knowing (age dependent) the location of their adrenaline auto-injector and ensuring that it is delivered to the office each morning when they arrive to school;
- carrying two adrenaline auto-injectors with them at all times (age dependent and in discussion and agreement with parents). They must only use them for their intended purpose;
- understanding how and when to use their adrenaline auto-injector;
- talking to the Designated Allergy Lead or a member of staff if they are concerned by any school processes or systems related to their allergy;
- raising concerns with a member of staff if they experience any inappropriate behaviour in relation to their allergies;
- if age and capability appropriate, ensuring they have their medication with them on the journey to and from school.

5. INFORMATION AND DOCUMENTATION

5.1 Register of pupils with an allergy

The school has a register of pupils who have a diagnosed allergy. This includes children who have a history of anaphylaxis or have been prescribed adrenaline pens, as well as pupils with an allergy where no adrenaline pens have been prescribed.

5.2 Individual Healthcare Plans

Each pupil with an allergy has an Individual Healthcare Plan. The information on this plan includes:

- known allergens and risk factors for allergic reactions;
- a history of their allergic reactions;
- detail of the medication the pupil has been prescribed including dose, this should include adrenaline pens, antihistamine etc;
- a copy of parental consent to administer medication, including the use of spare adrenaline pens in case of suspected anaphylaxis;
- a photograph of each pupil; and
- a copy of their Allergy Action Plan. See definitions for the BSACI templates.

6. ASSESSING RISK

Allergens can crop up in unexpected places. Staff (including visiting staff) will consider allergies in all activity planning and include it in risk assessments. Some examples include:

- classroom activities, for example craft using food packaging, science experiments where allergens are present, food lessons or cooking;
- bringing animals into the school, for example a dog or hatching chick eggs can pose a risk;
- running activities or clubs where they might hand out snacks or food “treats”. Ensure safe food is provided or consider an alternative non-food treat for all pupils; and
- planning special events, such as cultural days and celebrations.

Inclusion of pupils with allergies must be considered alongside safety and they should not be excluded. If necessary, adapt the activity. The school will ensure compliance with the Equality Act 2010.

7. FOOD, INCLUDING MEALTIMES & SNACKS

7.1 Catering in school

The school is committed to providing a safe meal for all students, staff and visitors, including those with food allergies. The school outsources catering at lunchtime to West Leigh Infant School. Food is prepared at Breakfast and After School Club by West Leigh Junior School Staff.

- Due diligence is carried out with regard to allergen management when appointing catering staff;

- All catering staff and other staff preparing food will receive relevant and appropriate allergen awareness training;
- The Early Years Foundation Stage statutory guidance will be adhered to. A member of staff with paediatric first aid will be present when children eat.
- Anyone preparing food for those with allergies will follow good hygiene practices, food safety and allergen management procedures;
- The catering team will endeavour to get to know the pupils with allergies and what their allergies are, supported by school staff;
- The catering team will endeavour to provide varied meal options to students and staff with allergies;
- The school has robust procedures in place to identify pupils with food allergies. The Pupil Parent Support Worker prepares allergy cards with children's photographs and allergies clearly labelled. These are collected by the children when they enter the Dining Hall and these children take a red tray. The allergy card is then handed to the serving member of catering staff so that their allergies can be taken into account.
- Food containing the main 14 allergens (see Allergens definition) will be clearly labelled on the lunch menu. Other ingredient information will be available on request.
- Pre-packaged food will comply with PPDS legislation (Natasha's Law) requiring the allergen information to be displayed on the packaging;
- Where changes are made to the ingredients this will be communicated to pupils with dietary needs;
- Precautionary Allergen Labelling or "May Contain" labelling will be part of the discussion between the school and parents;
- If a Junior School child attends Breakfast or After School Club, the usual routines will be followed: the child's Epipen will be in the office and will only be taken home when they leave school. For children with Epipens who attend our Breakfast or After School Club from the Infant School, we will note which children require Epipens (indicated through their registration form), indicate this on the daily register and these will be checked and held separately by the staff at Breakfast/After School Club until the child leaves, either to go to school or home.
- All products offered by the school will be nut free.

7.2 Food brought into school

Parents are asked to provide snacks and packed lunches that are nut free. If products are found to contain nuts in a lunchbox, class teachers will remind parents that food products need to be nut free. The same rules apply when packed lunches are taken on school visits.

Any food required for lessons such as in Design Technology or science will be ordered through the school office.

7.3 Food bans or restrictions

- This school is an Allergen Aware school. We have students with a wide range of allergies to different foods, so we encourage a considered approach to bringing in food.
- We aim to be a nut free school.

7.4 Food hygiene for pupils

- sharing, swapping or throwing food is not allowed;
- water bottles and packed lunches should be clearly labelled; and
- when taking part in Design and Technology sessions, teachers will ensure all food hygiene processes are followed.

7.5 Curriculum Food-Based Activities

- Staff must use the office to order any food to be used in class – for example in design technology, science or art.
- Before any food-based activity takes place, teachers must collect their class allergy cards from the SEN office. These cards must be checked to ensure that all pupils' allergies have been identified and that appropriate adaptations and control measures are in place.
- All food based activities are planned at the start of each school year and this is not deviated from without prior permission (appendix 2).

8. EDUCATIONAL VISITS AND SPORTS FIXTURES

- Staff leading the trip will have a register of pupils with allergies and details of their medication. Staff should notify the trip leader of any allergies;
- Allergies will be considered on the risk assessment and catering provision put in place;
- Parents, and pupils where appropriate, may be consulted if considered necessary, or if the trip requires an overnight stay;
- Staff (and some pupils, if appropriate) accompanying the trip will be trained to recognise and respond to an allergic reaction;
- Allergens will be clearly labelled on catered packed lunches. Communication will take place with any catering company involved in school visits. Parents will be a key part of this process.
- See Adrenaline Pens section for School Trips and Sports Fixtures.

9. INSECT STINGS

Those with a known insect venom allergy will:

- avoid walking around in bare feet or sandals when outside and when possible keep arms and legs covered;
- avoid wearing strong perfumes or cosmetics; and
- keep food and drink covered.

The school caretaker will monitor the grounds for wasp or bee nests. Pupils (with or without allergies) should notify a member of staff if they find a wasp or bee nest in the school grounds and avoid them.

10. ANIMALS

It's normally the dander ([flakes](#) of skin) saliva or urine that causes a person with an animal allergy to react.

Precautions to limit the risk of an allergic reaction include:

- a pupil with a known animal allergy should avoid the animal to which they are allergic;
- if an animal comes on site a risk assessment will be done prior to the visit;
- areas visited by animals will be cleaned thoroughly;
- anyone in contact with an animal will wash their hands after contact;
- school trips that include visits to animals will be carefully risk assessed.

11. ALLERGIC RHINITIS/ HAY FEVER

Parents should inform the school office if their child suffers from rhinitis/hayfever.

Procedures will be put in place to support the pupil. These include regular handwashing and encouraging to wash eyes if directed.

12. INCLUSION AND MENTAL HEALTH

Allergies can have a significant impact on mental health and wellbeing. Pupils may experience anxiety and depression and are more susceptible to bullying.

- No child with allergies should be excluded from taking part in a school activity, whether on the school premises or a school trip;
- Pupils with allergies may require additional pastoral support including regular check-ins from a key adult in school etc;
- Affected pupils will be given consideration in advance of wider school discussions about allergy and school Allergy Awareness initiatives; and
- Bullying related to allergy will be treated in line with the school's anti-bullying policy.

13. ADRENALINE PENS

[See the government guidance on Adrenaline Pens in Schools.](#)

13.1 Storage of adrenaline pens

- Pupils prescribed with adrenaline pens will have easy access to two, in-date pens at all times;
- Adrenaline pens will be stored in the office medical cupboard. Pens will be labelled and kept with the pupil's health care plan.
- Pupils who need to carry their adrenaline pens to and from school because they do not have a second set at home must have access to two adrenaline pens during their journey. On arrival at school, these pupils should hand their adrenaline pens to the school office, where they will be stored in the medical room. Children will then collect their pens at the end of the school day. A clear signing-in and signing-out procedure is used to ensure that office staff can monitor the location of all adrenaline pens and confirm that they are in the correct place at all times.
- Spot checks will be made to ensure adrenaline pens are where they should be and in date;
- Adrenaline pens must not be kept locked away;

- Adrenaline pens should be stored at moderate temperatures (see manufacturer's guidelines), not in direct sunlight or above a heat source (for example a radiator); and
- Used or out of date pens will be disposed of as sharps.

13.2 Spare adrenaline pens

This school has 2 spare adrenaline pens to be used in accordance with government guidance.

The location of spare adrenaline pens is clearly signposted and kept in the medical room.

The Allergy Lead is responsible for:

- deciding how many spare pens are required;
- what dosage is required, based on the Resuscitation Council UK's age-based guidance (see page 11);
- liaising with the central Trust team about which brand(s) to buy and the purchasing of adrenaline pens. Schools are recommended to buy a single brand if possible to avoid confusion;
- distribution around the site and clear signage.

13.3 Adrenaline pens on off-site activities

- No child with a prescribed adrenaline pen will be able to go on a school trip without two of their own devices. It is the trip leader's responsibility to check they have them;
- Adrenaline pens will be kept close to the pupils at all times e.g. not stored in the hold of the coach when travelling or left in changing rooms;
- Adrenaline pens will be protected from extreme temperatures;
- Staff accompanying the pupils will be aware of pupils with allergies and be trained to recognise and respond to an allergic reaction; and

14. RESPONDING TO AN ALLERGIC REACTION /ANAPHYLAXIS

See appendix 1 on recognising and responding to an allergic reaction.

If a pupil has an allergic reaction:

- treat the pupil in accordance with their Allergy Action Plan;
- if anaphylaxis is suspected administer adrenaline without delay;
- treat the pupil where they are. Lie them down with their legs raised and bring medication to them;
- use pupil's own prescribed medication if immediately available;
- pupil can administer the adrenaline pen themselves [if able to] or a member of staff can administer pen. Ideally the member of staff will be trained, but in an emergency, anyone can administer adrenaline;
- if the pupil's own adrenaline pen is not available or misfires, then use a spare adrenaline pen;
- if anaphylaxis is suspected but the pupil does not have a prescribed adrenaline pen or Allergy Action Plan, lie the pupil down with their legs raised, call 999 and explain anaphylaxis is suspected. Inform the operator that spare adrenaline pens are

available and follow instructions from the operator. The MHRA says that in exceptional circumstances, a spare adrenaline pen can be administered to anyone for the purposes of saving their life;

- if, after 5 minutes, there is no improvement, use a second adrenaline pen and call the emergency services again and inform them that a second dose of adrenaline has been given;
- do not move the pupil until a medical professional/ paramedic has arrived, even if they are feeling better; and
- anyone who has had suspected anaphylaxis and received adrenaline must go to hospital, even if they appear to have recovered. A member of staff should accompany them in an ambulance until a parent or guardian arrives.

15. TRAINING

15.1 The school is committed to training all staff annually to give them a good understanding of allergy. This includes permanent staff, temporary staff, supply teachers, peripatetic staff, agency workers and regular volunteers. It includes catering staff and others who may oversee children and young people at breakfast or after school clubs.

This includes:

- understanding what an allergy is;
- how to reduce the risk of an allergic reaction occurring;
- how to recognise and treat an allergic reaction, including anaphylaxis;
- how the school manages allergy, for example Emergency Response Plan, documentation, communication etc;
- where adrenaline pens are kept (both prescribed pens and spare pens) and how to access them;
- the importance of inclusion of pupils with food allergies, the impact of allergy on mental health and wellbeing and the risk of allergy related bullying;
- understanding food labelling; and
- taking part in an anaphylaxis drill.

15.2 The school will carry out an anaphylaxis drill once a year.

This includes:

- An exercise simulating an event where a pupil or member of staff has an allergic reaction and testing the whole school response.

16. ASTHMA

It is vital that pupils with allergies keep their asthma well controlled, because asthma can exacerbate allergic reactions. Asthma care plans will be followed as advised by healthcare professionals. Information of the storing of inhalers can be found in our Supporting Pupils with Medical Conditions policy.

17. REPORTING ALLERGIC REACTIONS

The school will log allergic reaction incidents and near-misses on the Kitt Medical service.

MANAGING ALLERGIC REACTIONS

ALLERGIC REACTIONS VARY

Allergic reactions are unpredictable and can be affected by factors such as illness or hormonal fluctuations.

You cannot assume someone will react the same way twice, even to the same allergen.

Reactions are not always linear. They don't always progress from mild to moderate to more serious; sometimes they are life-threatening within minutes.

MILD TO MODERATE ALLERGIC REACTIONS

Symptoms include:

- Swollen lips, face or eyes
- Itchy or tingling mouth
- Hives or itchy rash on skin
- Abdominal pain
- Vomiting
- Change in behaviour

Response:

- Stay with pupil
- Call for help
- Locate adrenaline pens
- Give antihistamine
- Make a note of the time
- Phone parent or guardian
- Continue to monitor the pupil

SERIOUS ALLERGIC REACTIONS / ANAPHYLAXIS

The most serious type of reaction is called **ANAPHYLAXIS**. Anaphylaxis is uncommon, and children experiencing it almost always fully recover.

In rare cases, anaphylaxis can be fatal. It should always be treated as a time-critical medical emergency.

Anaphylaxis usually occurs within 20 minutes of eating a food but can begin 2-3 hours later.

People who have never had an allergic reaction before, or who have only had mild to moderate allergic reactions previously, can experience anaphylaxis.

RESPONDING TO ANAPHYLAXIS

SYMPTOMS OF ANAPHYLAXIS

A – Airway

- Persistent cough
- Hoarse voice
- Difficulty swallowing
- Swollen Tongue

B – Breathing

- Difficult or noisy breathing
- Wheeze or cough

C - Circulation

- Persistent dizziness
- Pale or floppy
- Sleepy
- Collapse or unconscious

IF YOU SUSPECT ANAPHYLAXIS, GIVE ADRENALINE FIRST BEFORE YOU DO ANYTHING ELSE.

DELIVERING ADRENALINE

1. Take the medication to the patient, rather than moving them.
2. The patient should be lying down with legs raised. If they are having trouble breathing, they can sit with legs outstretched.
3. It is not necessary to remove clothing but make sure you're not injecting into thick seams, buttons, zips or even a mobile phone in a pocket.
4. Inject adrenaline into the upper outer thigh according to the manufacturer's instructions.
5. Make a note of the time you gave the first dose and call 999 (or get someone else to do this while you give adrenaline). Tell them you have given adrenaline for anaphylaxis.
6. Stay with the patient and do not let them get up or move, even if they are feeling better (this can cause cardiac arrest).
7. Call the pupil's emergency contact.
8. If their condition has not improved or symptoms have got worse, give a second dose of adrenaline after 5 minutes, using a second device. Call 999 again and tell them you have given a second dose and to check that help is on the way.
9. Start CPR if necessary.
10. Hand over used devices to paramedics and remember to get replacements.

For more information see the Government's [Guidance for the use of adrenaline auto-injectors in schools.](#)
